SUBJECT INDEX

Affinity chromatography of two sets of isomeric antibodies with specificity for different oligosaccharide units of gum arabic, 1
Alkaline anthraquinone-2-sulfonate–H_2O_2-catalyzed oxidative degradation of lactose: an improved Spengler–Pfannenstiehl oxidation, 71
6-*O*-Alkyl-α-D-galactopyranosyl fluoride, synthesis of, 331
3-*O*-Alkyl-α-D-glucopyranosyl fluoride, synthesis of, 331
Allergen Ag-54 (Cla h II) from the mould *Cladosporium herbarum*, structural studies of the carbohydrate moiety of the, 267
Antibodies with specificity for different oligosaccharide units of gum arabic, affinity chromatography of two sets of isomeric, 1
Anticoagulant activity of a fucan sulfate from the brown seaweed *Ecklonia kurome*, the sulfate-content dependence of the, 193

Base-catalyzed degradation of permethylated 4-*O*-glycosyl-glycopyranosid-2-uloses, 95
Bireactant, irreversible, active-site-directed inhibitor of β-D-galactosidase (*E. coli*): synthesis and properties of (1/2,5,6)-2-(3-azibutylthio)-5,6-epoxy-3-cyclohexen-1-ol, 35

Carbohydrate moiety of the allergen Ag-54 (Cla h II) from the mould *Cladosporium herbarum*, structural studies of the, 267
Cerebroside, lactosyl ceramide, and ganglioside GM analogs containing β-thioglycosidically linked ceramide, synthesis of, 43
Characterization of complex formation between lipopolysaccharide and lysozyme, 115
Chemical composition conformation and intrinsic viscosity, hydrolysis of xanthan in dilute acid: effects on, 55
Complexes of cyclomalto-oligosaccharides and azobenzene derivatives, induced circular dichroism spectra of, 25
Conformational study of a sugar nitroxyl free radical, 235
Cross-linked degradable starch microspheres as carriers of paramagnetic contrast agents for magnetic resonance imaging, synthesis, degradation and relaxation properties of, 325
Cyclomalto-oligosaccharides and azobenzene derivatives, induced circular dichroism spectra of complexes of, 25
Cyclomalto-oligosaccharides, synthesis and characterisation of some lipophilic per(2,6-di-*O*-alkyl)-, 257

Degradation of permethylated 4-*O*-glycosyl-glycopyranosid-2-uloses, base-catalyzed, 95
Dermatan sulfate, sulfation of, 245

Egg-yolk membrane, large-scale preparation of sialic acid from chalaza and, 179

Fluorescent conjugates, a new method for sequencing carbohydrates on gels using charged, 155
Francisella tularensis strain 15, structure of the O-antigenic polysaccharide of, 289
D-Fructofuranose-6-phosphates and D-fructofuranoses, synthesis of partially protected, 187
D-Fructofuranoses and D-fructofuranose-6-phosphates, synthesis of partially protected, 187
Fucan sulfate from the brown seaweed *Ecklonia kurome*, the sulfate-content dependence of the anticoagulant activity of, 193
L-Fuco-4-*O*-methyl-D-glucurono-D-xylan from *Hyptis suaveolens*, a novel, 107
Furanones from D-xylose by regio- and stereoselective functionalization, practical synthesis of optically pure 3,4-epoxy-5-methyldihydro-2-(3*H*)-, 87

α-D-Galactopyranosyl fluoride, 6-*O*-alkyl-, synthesis of, 331
Galactosidase (*E. coli*): synthesis and properties of (1/2,5,6)-2-(3-azibutylthio)-5,6-epoxy-3-cyclohexen-1-ol, a bireactant, irreversible, active-site-directed inhibitor of β-D-, 35
Gellan-related polymers: molecular structures of welan, S-657, and rhamsan, X-ray and computer modeling studies on, 11
α-D-Glucopyranosyl fluoride, 3-*O*-alkyl-, synthesis of, 331
O-Glycopeptide sequence, *N*-terminal-, of interleukin-2, conformation of, 199
O-Glycopeptide sequences containing D-xylose, conformation of, 227
Glycosyl-glycopyranosid-2-uloses, base-catalyzed degradation of permethylated 4-*O*-, 95
Gum arabic, affinity chromatography of two sets of isomeric antibodies with specificity for different oligosaccharide units of, 1

HIV-induced cytopathic effects by synthetic (1→6)-α-D-mannopyranan sulfate, a strong inhibition of, 147
Hydrolysis of xanthan in dilute acid: effects on chemical composition, conformation and intrinsic viscosity, 55

Hyptis suaveolens, a novel L-fuco-4-*O*-methyl-D-glucurono-D-xylan from, 107

α-D-Idopyranoside, methyl 4,6-*O*-benzylidene-, sulfation of, 245
Induced circular dichroism spectra of complexes of cyclomalto-oligosaccharides and azobenzene derivatives, 25
Inhibitor of β-D-galactosidase (*E. coli*): synthesis and properties of (1/2,5,6)-2-(3-azibutylthio)-5,6-epoxy-3-cyclohexen-1-ol, a bireactant, irreversible, active-site-directed, 35
Interleukin-2, conformation of the *N*-terminal *O*-glycopeptide sequence of, 199

Kinetic and mechanistic studies on the rearrangement of 1-(substituted phenyl)-1,3-dimethoxy-2-propanones, 169

Lactose: an improved Spengler–Pfannenstiehl oxidation, the alkaline anthraquinone-2-sulfonate–H_2O_2-catalyzed oxidative degradation of, 71
Large-scale preparation of sialic acid from chalaza and egg-yolk membrane, 179
Lipophilic per(2,6-di-*O*-alkyl)cyclomalto-oligosaccharides, synthesis and characterisation of some, 257
Lipopolysaccharide and lysozyme, characterization of complex formation between, 115
Lysozyme, characterization of complex formation between lipopolysaccharide and, 115

Magnetic resonance imaging, synthesis and relaxation properties of water-soluble polysaccharides as carriers of paramagnetic contrast agents for, 315
Magnetic resonance imaging, synthesis, degradation, and relaxation properties of cross-linked degradable starch microspheres as carriers of paramagnetic contrast agents for, 325
D-Mannans of pathogenic yeasts *Candida stellatoidea* Type I strains: TIMM 0310 and ATCC compared with IFO 1397, 131
Mannopyranan sulfate, a strong inhibition of HIV-induced cytopathic effects by synthetic (1→6)-α-D-, 147
Methyl 4,6-*O*-benzylidene-α-D-idopyranoside, sulfation of, 245
Musanga cercropoides, structural studies of a rhamnogalacturonan from the stipules of the umbrella tree, 281

New method for sequencing carbohydrates on gels using charged fluorescent conjugates, 155
Nitroxyl free radical, conformational study of a sugar, 235
Novel L-fuco-4-*O*-methyl-D-glucurono-D-xylan from *Hyptis suaveolens*, 107

Optically pure 3,4-epoxy-5-methyldihydro-2-(3*H*)-furanones from D-xylose by regio- and stereo-selective functionalization, practical synthesis of, 87
Oxidative degradation of lactose: an improved Spengler–Pfannenstiehl oxidation, the alkaline anthraquinone-2-sulfonate–H_2O_2-catalyzed, 71

Paramagnetic contrast agents for magnetic resonance imaging, synthesis and relaxation properties of water-soluble polysaccharides as carriers of, 315
Paramagnetic contrast agents for magnetic resonance imaging, synthesis, degradation, and relaxation properties of cross-linked degradable starch microspheres as carriers of, 325
Peptide, *O*-glyco-, sequences containing D-xylose, conformation of, 227
Polysaccharide from tamarind seed, structure and solution properties of the major, 299
Polysaccharide of *Francisella tularensis* strain 15, structure of the O-antigenic, 289
Practical synthesis of optically pure 3,4-epoxy-5-methyldihydro-2-(3*H*)-furanones from D-xylose by regio- and stereo-selective functionalization, 87
Propanones, kinetic and mechanistic studies on the rearrangement of 1-(substituted phenyl)-1,3-dimethoxy-2-, 169

Rearrangement of 1-(substituted phenyl)-1,3-dimethoxy-2-propanones, kinetic and mechanistic studies on the, 169
Rhamnogalacturonan from the stipules of *Musanga cercropoides*, structural studies of a, 281

Sequence of *N*-terminal *O*-glycopeptide sequence of interleukin-2, conformation of, 199
Sequencing carbohydrates on gels using charged fluorescent conjugates, a new method for, 155
Sialic acid from chalaza and egg-yolk membrane, large-scale preparation of, 179
Strong inhibition of HIV-induced cytopathic effects by synthetic (1→6)-α-D-mannopyranan sulfate, 147
Structural determination of D-mannans of pathogenic yeasts *Candida stellatoidea* Type I strains: TIMM 0310 and ATCC 11066 compared with IFO 1397, 131
Structural studies of the carbohydrate moiety of the allergen Ag-54 (Cla h II) from the mould *Cladosporium herbarum*, 267

Structural studies of a rhamnogalacturonan from the stipules of *Musanga cercropoides*, 281
Structure and solution properties of tamarind-seed polysaccharide, 299
Structure of the O-antigenic polysaccharide of *Francisella tularensis* strain 15, 289
Sugar nitroxyl free radical, conformational study of a, 235
Sulfate-content dependence of the anticoagulant activity of a fucan sulfate from the brown seaweed *Ecklonia kurome*, 193
Synthesis and characterisation of some lipophilic per (2,6-di-*O*-alkyl)cyclomalto-oligosaccharides, 257
Synthesis of cerebroside, lactosyl ceramide, and ganglioside GM analogs containing *β*-thioglycosidically linked ceramide, 43

Tamarind-seed polysaccharide, structure and solution properties of, 299

Water-soluble polysaccharides as carriers of paramagnetic contrast agents for magnetic resonance imaging, synthesis and relaxation properties of, 315
Welan, S-657, and rhamsan, X-ray and computer modeling studies on gellan-related polymers: molecular structures of, 11

Xanthan in dilute acid: effects on chemical composition, conformation and intrinsic viscosity, hydrolysis of, 55
X-Ray and computer modeling studies on gellan-related polymers: molecular structures of welan, S-657, and rhamsan, 11
D-Xylose-containing *O*-glycopeptide sequences, conformation of, 227

Yeasts *Candida stellatoidea* Type I strains: TIMM 0310 and ATCC compared with IFO 1397, structural determination of D-mannans of pathogenic, 131
